Super Contraption 3D is a database driven 3D physics sandbox game with powerful capabilities. This isn't for everyone! The construction process can be complicated. Only people who want to tinker around in a physics sandbox should try this. Since this is a physics simulation game it should be played on a relatively modern device, preferably connected to power. This is an indie game fully programmed by myself (Elliot). I make regular updates and appreciate feedback. - Create a device of any kind, limited only by your imagination. - Create custom worlds with unique physics properties. - Make or browse through great constructions and vehicles! - Play user generated mini games! Build whatever device you imagine and experiment in custom environments and worlds. Set up a custom simulation and experiment the way you want it. Search the database to play with numerous user-driven projects or edit them. Create, share and play Mini-Games.See which machines you come up with. See how your constructions work under different conditions. Publish your creations and see what other creative people do with them. Create a unique world to experiment in. Play with gravity, drag, magnetism and more with more concepts that are added regularly. Playing Super Contraption 3D on a slower device can cause your battery to leegrade faster than normal. Super Contraption 3D 1.45 Update v 1.45 - Added teleport pads, corrected issues with game maker part.v 1.44 - Optimizations due to upcoming PC release - Can now share projects with your facebook timelinev 1.43 Problem where various features from version 1.34 were missing.v 1.42 Added a winch, to raise and lower objects.v 1.41 1.41 the add that appears for some devices in the middle of everything. Fixed glitch where custom buttons wouldn't go away. Read more Super Contraption 3D is a database driven 3D physics sandbox game with powerful capabilities. This isn't for everyone!
